

Phan Phuoc Trung

Frontend Developer

Date of birth: Aug 08, 1996
Gender: Male
Phone: 035 2804 743
Email: phuoctrung.ppt@gmail.com
Address: Da Nang, Viet Nam
Website: <https://github.com/phuoctrung-ppt>

OBJECTIVE

I aspire to leverage my development skills and experience to create meaningful customer value while advancing as a dedicated professional developer. My motivation to master new technologies and achieve Full Stack proficiency drives me. I maintain a proactive learning stance, striving to consistently provide superior solutions that bolster project success.

EDUCATION

Aug 2014 - Aug 2018	Danang University of Technology and Education Major: Information Technology GPA: 3.0/4
---------------------	---

SKILL SUMMARY

With over 3 years of software development experience, I have demonstrated proficiency in:

- JavaScript and TypeScript, utilizing them to craft dynamic and efficient applications
- Creating single-page applications using various JavaScript libraries and frameworks.
- Conducting thorough unit testing with tools like Jest, as well as end-to-end testing using Cypress.
- Crafting engaging web designs using HTML5, and CSS framework for seamless user experiences.
- Implementing RESTful Web Services, showcasing practical experience in backend development.
- Leveraging Node.js, Express.js, and NestJS frameworks to build robust and scalable applications.
- Command of Linux environments and adeptness in batch scripting for efficient workflows.
- Proficiency in web bundler tool including Webpack, Vite, and Rollup for optimizing site performance.
- Exemplary self-studying skills, underpinned by proactive thinking and a drive for continuous improvement.

SKILLS

Language	Vietnamese, English
OS	Windows, Linux
Programing Language	JavaScript, TypeScript, Bash scripting
Database	PostgreSQL, MongoDB
Frameworks & Libraries & Services	<div>- Frontend: ReactJS, NextJS</div> <div>- Store management: Redux, Redux Toolkit</div> <div>- Middleware: PassportJS, Redux-Thunk, Redux-Saga</div> <div>- Backend: NodeJS, ExpressJS, NestJS</div> <div>- Testing: Jest, Cypress</div> <div>- Message broke & caching: RabbitMQ, Redis, Websocket, Tanstack</div> <div>- Architectures: Microservices, Micro-Frontend</div> <div>- UI Framework & CSS Preprocessor: Material UI, SCSS, Tailwind</div> <div>- RESTful web services</div>
Methodologies & Tools	<div>- Agile methodologies</div>

- Postman tool
- Figma
- Jira
- Git
- Docker
- AWS (EC2, S3)

WORK EXPERIENCE

Aug 2022 - Present	Sotatek Fullstack Developer Main responsibilities: <ul style="list-style-type: none">• Maintain and implements new features• Implement UI components to mono-repo based on Rollup• Prioritize tasks in detail and provide support to the team.• Resolve incidents and fix bugs.• Break tasks, assign and review the code of team members
Jan 2022 - Aug 2022	FPT Software Frontend Developer Main responsibilities: <ul style="list-style-type: none">• Develop and maintain the frontend infrastructure.• Creating standard components has reusing modules• Support Team Leader in code reviews.• Prioritize tasks and provide team support.• Incident and bug fixing
Nov 2019 - Dec 2021	Hitachi Vantara Web Developer Main responsibilities: <ul style="list-style-type: none">• Analyze and design systems based on client requirements.• Develop frontend and API Gateway infrastructure.• Create common components and design the backend for the front end of the API Gateway.• Implement authentication and new features.• Implement new features, incident, and bug fixing

PROJECTS

E Payment System Solution

(2022 - Present)

Customer	Malaysia
Description	A module in a web/mobile app ecosystem which E-payment solutions
Team size	5
My position	Fullstack Developer
My responsibilities	<ul style="list-style-type: none">- Maintenance and integration of new features, contributing to the continuous enhancement of our products- Refactor existing code base and add e2e test to increase code coverage- Collaborate with other teams to implement new features which involve multiple business domains and work smoothly with concept microservices, micro frontend- Proactively addressing incidents and debugging, swiftly resolved bugs to maintain a seamless user experience- Adeptly assigned tasks, reviewed code, and fostered a culture of code quality among team members.

Technologies used	Programming language: Typescript - Technologies & frameworks: ReactJS 17, NestJS, NextJS - Database: MongoDB - Cloud & architectures: Microservices, Micro Frontend, AWS - Store management: Redux Toolkit - Message broker: RabbitMQ - Cache: Redis, react-query - Testing: Jest, React Testing library, Cypress - Source code control tools: Git
--------------------------	--

ECO-System

(2022 - 08/2022)

Customer	Korean
Description	Implement Web-app base on Cordova Apache for ECO-System
Team size	8
My position	Frontend Developer
My responsibilities	<ul style="list-style-type: none"> - Analyses of existing systems, identifying areas for improvement and efficiency enhancement. - Infrastructure for a new project, centered around the micro-frontend concept. This architecture facilitated modular development and seamless integration of components. - Involved in writing code and seamlessly integrating our systems with a third-party Robotic Platform, contributing to the overall functionality and capabilities of our solutions. - Optimized code to improve performance - Creating reusable common components that could be leveraged across various sub-modules, streamlining development and ensuring consistency. - Meticulously prioritizing tasks and providing support to teammates, effectively tackling challenges and fostering a collaborative environment
Technologies used	- ReactJS, Redux, Typescript, ES6, 3rd party, Jest, Webpack

Multi services platform

(2021 - 2022)

Customer	Japanese
Description	Management services of camera for business
Team size	4
My position	Frontend Developer
My responsibilities	<ul style="list-style-type: none"> - Analyses of systems, identifying areas for improvement and efficiency enhancement. - Implementing new features in alignment with project requirements, enhancing overall functionality. - Optimizing code to enhance performance and user experience. - Writing unit tests utilizing Jest, ensuring robust code quality and reliability.- Diligently addressing incidents and bugs, maintaining a seamless user experience.
Technologies used	- ReactJS, NextJS, NodeJS, Express, MaterialUI, Redux, Jest

Payment automation

(Aug 2020 - Dec 2020)

Customer	Vietnam
Description	Managing tax and bonus of employee
Team size	3
My position	Frontend Developer
My responsibilities	<ul style="list-style-type: none"> - Maintained and implemented new features based on Angular 8. - Handled incident and bug fixing.
Technologies used	Angular 8, Typescript, Bootstrap, Git, HTML5, CSS3

Healthcare Services

(Nov 2019 - Aug 2020)

Customer	An IT Services at Canada
Description	Patient management and provide healthcare services

Team size	5
My position	Automation Tester
My responsibilities	<ul style="list-style-type: none">- Found bugs and report bugs-Defined methods and common practices for automation testing using frameworks based on TestNG and Selenium.- Work with Agile Scrum processes and modify pipelines for deploying automation test entities- API and performance testing using Postman and JMeter- Work on integration tests- Provide daily reports to the client- Support teammates with technical skills in developing automated test projects
Technologies used	Java, Selenium, Karma, Javascript, JMeter

INTERESTS

I like driving around, rap, read a book, play billiards
